Using Persistent Links to Share Library Resources over the Web

Slide 1

If you find an ebook or full-text article from the Library that you would like to share with your students, you can link directly to it in your Laulima or WebCT course, on your course web page, or in an email to your students.

This saves you having to make a copy of it yourself or using the Library’s Course Reserves and avoids copyright "fair use" issues entirely.

On Saturday, 2/9, the library will be open 10 a.m. - 3 p.m.

Slide 2

This is the title of an article I'd like to share.

Chocolate News to Smile About

The URL I provide my students needs to begin with the Library’s EZ Proxy prefix.

This "prefix" is what will prompt the network to ask for a UH/HawCC username and password before opening the requested page.

This ensures that our students will be able to view this material even if they’re off-campus.
Using Persistent Links to Share Library Resources over the Web

Slide 3

Chocolate News to Smile About

The "2048" in the prefix is for any resource available to anyone at UHH or HawCC.

If you are pointing to a "UHH Only" resource, like ASFA or Biological Abstracts, you’ll need to use "3000" instead of "2048":

---

Slide 4

Many of our databases provide a Persistent Link (a.k.a., "Stable URL") on their records.

This example is from EBSCO.

Scroll down the page to view more.
Slide 5

Using Persistent Links to Share Library Resources over the Web

This is the link EBSCO is providing for you to use in your online course, course web page, or email.

Copy the entire URL and add it to the EZ Proxy prefix the Library is providing.

Slide 7

Chocolate News to Smile About

The combination of EZ Proxy prefix + Persistent Link is what you can provide to your students.

Slide 8

You can also link directly to electronic books from the Library's ebrary collection.

The link is provided in the catalog record for each book.

Scroll down the page to view more.
